

How to vote in the online General Elections 2023

The following instructions explain step-by-step the actions you need to perform in the electronic voting system.

1. Step: Voting

Select a voting option and submit the vote.

2. Step: Vote Verification with verification code

Once all votes have been counted and the result is ready, you will receive two personal verification codes by e-mail. You can either scan the QR code and check if the displayed voting option matches your selection. Alternatively, you can go to this website: [Link to BB](#) where you can search for your alphanumeric verification code. Check that the voting option next to the verification code in the table matches your selection.

Why should I verify my vote?

To ensure the correctness of the voting result in an online election, it is very important that you verify your vote. We can only detect possible manipulations if as many voters as possible verify their vote and report errors. It will take you less than two minutes and is completely anonymous. If you would like to learn more, please visit the General Election 2023's [official website](#) where you can find a short video on vote verification.

Have you encountered an error?

If you cannot verify your vote or the displayed voting option does not match your selection, please report the error via the contact form linked below.
